

AI DISCOVERY IS THE **FLOOR**. NOT THE FINISH LINE.

"Remember, it is still early. It is not perfect, but the people paying attention right now are the ones who will be miles ahead when this becomes the standard way all work."

~ Edwina McKennon

(Founder of FuturIQ and a recognized AI strategist and global speaker.)

Exploring isn't the same as building. Here's what going deeper actually looks like.

I went deeper - here's the proof

- **Built a self-configuring job search agent system**
 - 4 automated weekly tasks · multi-source prioritization
- **Completed a full analytics project from scratch**
 - SQL → Excel → Power BI · real data · zero shortcuts
- **Built a custom AI tool from scratch**
 - AI Role Revealer · prompt engineering · Claude Projects · Github page
- **Automated my entire weekly content pipeline** (*AI Skill + Productivity series & Operations, Augmented series*)
 - Scripts · LinkedIn posts · topic tracking · runs on a timer
- **Designing operational systems with AI**
 - Not just asking it questions
- **Earned the Google AI Professional Certificate (Google / Coursera)**
 - 7 courses · 20+ AI artifacts built · prompt design · data analysis · app building
